

SB 842 -- DIESEL FUEL INSPECTIONS

Currently, the Director of the Department of Revenue or his or her agents or appointees may conduct inspections and remove samples of fuel for motor fuel tax purposes to determine the coloration of diesel fuel or to identify shipping paper violations at any place where motor fuel is or may be produced, stored, or loaded into transport vehicles. This bill prohibits the inspection and removal from any individual who is not holding the fuel for wholesale or retail sale and who is not located at specified facilities or locations unless the department director or his or her agents or appointees have reasonable suspicion to believe that a violation under the provisions of Chapter 142, RSMo, is being committed at a location other than those specified.
